Tronox Titanium Dioxide

September 18, 2017

Nanoparticle

Tronox titanium dioxide is a synthetic or manufactured product made by purifying and concentrating a naturally occurring titanium dioxide bearing ore. Tronox titanium dioxide is a white pigment offered in dry powder and liquid slurry form.

Tronox, to the best of our current knowledge, does not intentionally manufacture titanium dioxide pigment products in nanoparticles size as defined by ISO/TC 229[1].

For more clarification please see Titanium Dioxide Manufacturers Association (TDMA) statement following this link. http://www.tdma.info/positions-statements

Tronox LLC is a member of TDMA.

Please contact Tronox product stewardship manager with questions regarding this statement, ChemProdSteward@tronox.com

[1] ISO/TC 229 Nomenclature system for nanoparticles

Tronox titanium dioxide may not be directly added to food, pharmaceuticals, or cosmetics. Tronox titanium dioxide may not be used for implantable medical devices used for life-sustaining or life-supporting applications in humans.

The information set forth herein is furnished free of charge and based on technical data that Tronox believes to be reliable, to the best of knowledge. Nothing herein is to be taken as license to operate under or a recommendation to infringe any patents. This information and our technical advice - whether verbal, in writing or by way of trials -are given to the best of our knowledge but without warranty, and this also applies where proprietary rights of third parties are involved.
