

Tronox Titanium Dioxide

Radioactive Materials

Tronox titanium dioxide products contain no intentionally added radioactive materials. While titanium dioxide is derived from ore sources where naturally occurring radioactive materials (NORM) may be present, titanium dioxide pigments as manufactured are stable and show no measurable radioactive instability or degradation.

The information set forth herein is furnished free of charge and based on technical data that Tronox believes to be reliable, to the best of knowledge. Nothing herein is to be taken as license to operate under or a recommendation to infringe any patents. This information and our technical advice - whether verbal, in writing or by way of trials - are given to the best of our knowledge but without warranty, and this also applies where proprietary rights of third parties are involved. Our advice does not release you from the obligation to check its validity and to test our products as to their suitability for the intended processes and uses. The application, use and processing of our products and the products manufactured by you on the basis of our technical advice are beyond our control and, therefore, entirely your own responsibility. Our products are sold in accordance with our General Conditions of Sale and Delivery.
