

CRISTALACTIV™
DT-20**PRODUCT DATA SHEET**www.cristalactiv.com

Description: CristalACTIV™ DT-20 is a low surface area ultrafine TiO₂ powder recommended for - but not limited to - chemical catalysis.

Applications: CristalACTIV™ DT-20 is recommended for evaluation in:

- Chemical catalysis
- Ti precursor for mixed oxides (electronics, energy storage)

Typical Properties: This document does not constitute a specification. Product specifications are available upon request.

- Crystal form: Anatase
- TiO₂ content (ignited base): ~99 wt%
- Surface area: ~20 m²/g

Regulatory Status: CristalACTIV™ DT-20 has a wide range of regulatory approvals for various applications worldwide. Please see www.tronox.com or contact your Tronox sales representative for additional information. Regulatory information requests may also be submitted at chemprodsteward@tronox.com.
