

CRISTALACTIV™
MC-10

PRODUCT DATA SHEET

www.cristalactiv.com

Description: CristalACTiV™ MC-10 is a high surface area ultrafine TiO₂ powder with addition of WO₃ recommended for extruded catalysts for the Selective Catalytic Reduction (SCR) of NO_x (DeNO_x).

Applications: CristalACTiV™ MC-10 is recommended for evaluation in:

- SCR DeNO_x

Typical Properties: This document does not constitute a specification. Product specifications are available upon request.

- | | |
|--|-----------------------|
| • Crystal form: | Anatase |
| • TiO ₂ content (ignited base): | ~90 wt% |
| • Surface area: | ~90 m ² /g |

Regulatory Status: CristalACTiV™ MC-10 has a wide range of regulatory approvals for various applications worldwide. Please see www.tronox.com or contact your Tronox sales representative for additional information. Regulatory information requests may also be submitted at chemprodsteward@tronox.com.
