

# Yanbu

Advanced technology was the driving force in the establishment of Tronox's Yanbu Plant in 1989 to produce titanium dioxide using the chloride process. Since then, the plant has successfully delivered products of the highest quality. The plant is the first in the world that is fully integrated with a TiO<sub>2</sub> pigment plant creating value through economies of scale and operation synergies.

Tronox Yanbu Complex | The Gulf Titanium Co. Ltd., Kilo 21, PO Box 30320 | Yanbu Al-Sinaiyah 41912  
Kingdom of Saudi Arabia | Phone: +966 14 328 3000

In 2024, internal quality management systems have been certified to ISO 50001, and the company has been affiliated with the American Society for Quality (ASQ) USA and the Institute of Quality Assurance (IQA) UK. The successful adoption of advanced technology by the Yanbu Plant was, and remains, the genesis of Tronox's further ambitions across the titanium value chain; most significantly in its latest joint venture with Toho Titanium of Japan, in the expansion of a HiPOL TiO<sub>2</sub> pigment plant to deliver cost-advantaged and high-quality titanium tetrachloride (TiCl<sub>4</sub>) to produce titanium metal sponge.

The Research and Development facility at Yanbu, established in 2003 – 2004, is the core of our business strategy, with the entire range of related pilot plants required to scale-up its different projects and product innovation.

## SAFETY

At Tronox, we aspire to achieve zero harm. We believe safety performance is the outcome of how we work. We operate our business realizing the mark we leave extends beyond the minerals we extract or the pigment we manufacture. It is about the way we do business and the example we set. Operating safely and responsibly is an integral part of our business.

## OVERVIEW

The workforce for Tronox in the Kingdom of Saudi Arabia consists of 583 employees. We are deeply committed to sustainable growth, striking a balance between creating economic value and addressing the social concerns of the communities where we operate. At the same time, we prioritize environmental stewardship, ensuring our actions reflect a responsible and forward-thinking approach to both people and the environment.

## RESPECTING SOCIAL CONCERNS

Tronox's Yanbu plant strives to be a valuable and responsible corporate citizen by proactively engaging with the community, providing job opportunities, and participating in multiple social responsibility campaigns.

## • COMMUNITY AND VOLUNTEERISM

The Yanbu Plant is a frequent advocate of corporate social responsibility. Through donations and volunteer work, the site initiates regular Ramadan/Eid community activities and donations, hospital visits, house construction for the needy, blood drives, and water distribution for neighboring villages. The plant also holds trainings with Yanbu's Civil Defense, participates in national projects aiming to help those with special needs, and sponsors major city events and campaigns. In recognition of our community work we have also received the 'Responsible Care Award' from Yanbu Royal Commission.

## • EDUCATION

The Yanbu Plant is in the forefront of KSA industrial companies supporting the development of a skilled Saudi human resources base, achieving record green levels of Saudization. This is coupled with training opportunities for career growth and stimulating job opportunities as the plant continues to expand.

## CARING FOR THE ENVIRONMENT

## • EMISSIONS

Yanbu Plant is monitoring the atmospheric emissions and fully complies with environmental regulatory standard. Reduction of these emissions is continuously improving through multiple initiatives. The Environmental Management System (EMS) at Yanbu received a ISO:14001 standard certification.

## • ENERGY

There are a number of initiatives that are targeting the reduction of energy consumption and improve the environmental footprint of the site. These initiatives aim to optimize the use of different energy resources on Yanbu site such as electricity, steam, fuel gas, LPG and oxygen. The Yanbu site has ISO 50001 certification.

## WORKING HERE

At Tronox, we believe that our employees are the driving force behind our success. While our advanced technology and operational proficiency enable us to establish a strong market presence globally, it is our exceptional people that truly sets us apart. Our employees are the most diverse group in the industry, both culturally and geographically, and their extensive knowledge and abilities form the basis of our excellence.

## ABOUT TRONOX

Tronox Holdings plc is one of the world's leading producers of high-quality titanium products, including titanium dioxide pigment, specialty-grade titanium dioxide products and high-purity titanium chemicals; and zircon. We mine titanium-bearing mineral sands and operate upgrading facilities that produce high-grade titanium feedstock materials, pig iron and other minerals. With nearly 6,500 employees across six continents, our rich diversity, and unparalleled operational and technical expertise across the value chain, position Tronox as the preeminent titanium dioxide producer in the world. For more information about how our products add brightness and durability to paints, plastics, paper and other everyday products, visit [www.tronox.com](http://www.tronox.com).
