1. Introduction

- 1.1. This is the Statement of Investment Principles prepared by the Trustees of the Millennium Inorganic Chemicals (U.K.) Pension Scheme ("the Scheme"). This statement sets down the principles which govern the decisions about investments.
- 1.2. In preparing this statement the Trustees have consulted Tronox Pigment UK Limited, the Principal Employer, and obtained advice from Barnett Waddingham LLP, the Trustees' investment consultant. Barnett Waddingham is wholly owned by Howden UK&I Jersey Limited and is authorised and regulated by the Financial Conduct Authority.
- 1.3. The Trustees will review this statement at least every three years or if there is a significant change in any of the areas covered by the statement.
- 1.4. The Trustees completed a bulk annuity insurance transaction with Just Retirement Limited (the "Insurer") on 5 September 2025 to secure the benefits under the Scheme.

2. Choosing investments

- 2.1. The Trustees' policy is to set the overall investment target and then monitor the performance of the Scheme against that target. In doing so, the Trustees consider the advice of their professional advisers, who they consider to be suitably qualified and experienced for this role.
- 2.2. Effective from 5 September 2025, the Trustees entered into a bulk annuity insurance contract with the Insurer, which is expected to match all defined benefits due to members of the Scheme.
- 2.3. The Insurer is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.
- 2.4. The Trustees hold no other investments beyond cash in the Scheme's bank account and a small residual cash holding with the Scheme's previous investment manager, CVC Credit Partners, that is being held until the manager's 2025 audit is completed (noting this is held in a custody account and will be returned in April/ May 2026 upon completion of the audit).
- 2.5. The Trustees continue to review the appropriateness of the Scheme's investment strategy on an ongoing basis but would consider it unlikely that any material future changes will be made prior to the Just insurance policy potentially being assigned to individual members and the Scheme then being wound up.

3. Investment objectives

- 3.1. The Trustees have discussed key investment objectives in light of an analysis of the Scheme's liability profile as well as the constraints the Trustees face in achieving these objectives. As a result, the Trustees' main investment objectives are:
 - to hold assets that provide a high likelihood that members' entitlements under the Trust Deed and Rules will be met in full as they fall due;
 - to invest in assets of appropriate liquidity to meet potential remaining liabilities that are not covered by the bulk annuity policy; and
 - to reduce the risk of the assets failing to meet the liabilities over the long term.

- 3.2. The Trustees are aware of the relationship that exists between the particular investment portfolio that is held and the level of funding of the Scheme's liabilities. The Trustees have obtained exposure to investments that they expect will meet the Scheme's objectives as best as possible.

4. Kinds of investments to be held

- 4.1. The Scheme is permitted to invest in a wide range of assets including equities, bonds, cash, property alternatives and annuity policies. The Scheme's current investment strategy involves holding the majority of the Scheme's assets in a bulk annuity insurance contract, with a small cash holding to meet ongoing cashflow requirements.
- 4.2. Given the Scheme's investment strategy, it is not expected that the Scheme will hold any employer-related investments. However, this is typically checked annually by the Scheme's auditors.

5. The balance between different kinds of investments

- 5.1. The Scheme invests in assets that are expected to achieve the Scheme's objectives.
- 5.2. The Scheme holds a bulk annuity policy expected to produce cashflows that exactly match the benefit entitlements of each of the Scheme's members. The remainder of the Scheme's assets are held in the Scheme's bank account.

6. Risks

- 6.1. The various types of investment risk which may affect the Scheme's liabilities are covered under the bulk annuity purchase with the Insurer. Therefore, the vast majority of the risks set out below are covered by the insurance policy, and are therefore judged to have minimal impact on the Scheme's ability to meet the liabilities of the Scheme as they fall due. However, the Trustees have considered the following risks for the Scheme with regard to its investment policy and the Scheme's liabilities:

Risk versus the liabilities	The Trustees note that by securing the Scheme's benefits with an insurer, the risk of benefits not being met is now very low.
Covenant risk	The Scheme is less reliant on the strength of the Employer's covenant as the Scheme's benefits have largely been secured with an insurer. When converting the buy-in policy into a buy-out policy with the Insurer, the Scheme will be reliant on the Employer to make good any shortfall in excess of the small amount of assets held outside of the insurance contract.
Insurer counter party risk	The risk of the insurer defaulting has been managed through the selection of a reputable UK regulated insurer and potentially supported by the insurance compensation regime in place should an insurer fail.
ESG/Climate risk	The Trustees have considered long-term financial risks to the Scheme and ESG factors (as well as climate risk). While the Trustees consider these factors to be potentially financially material, management of these risks over the lifetime of the contract is primarily an issue for the Insurer to manage.
Concentration risk	The Insurer is expected to manage a broadly diversified portfolio and to spread assets across a number of individual shares and securities.
Liquidity risk	The Scheme holds cash such that there is a sufficient allocation to liquid investments to meet the Scheme's remaining cashflow requirements that are not covered by the bulk annuity insurance

	contract. The Scheme's administrators monitor the level of cash available in the Scheme's bank account.
Currency risk	The Scheme's liabilities and the income produced by the bulk annuity contract are both denominated in sterling.
Loss of investment	In the event of the Insurer becoming insolvent, the Scheme could suffer losses on the contract but would still retain the liability to pay members' benefits. This risk is mitigated by the regulatory regime and capital requirements in place for UK insurers.

7. Expected return on investments

- 7.1. The Trustees have chosen to invest the vast majority of assets in a bulk annuity policy to match the Scheme's projected benefit payments with income from the policy. The remaining assets are held bearing in mind the nature of the potential additional liabilities that may fall due on the Scheme that are not covered by the policy, and ongoing expenses.
- 7.2. The Trustees have not set an expected return on the bulk annuity policy, given that its primary purpose is as an insurance contract rather than a return-seeking investment.

8. Realisation of investments

- 8.1. The annuity policy with the Insurer is not readily realisable and the Trustees do not expect to need to surrender or realise the contract given its nature and purpose. The income from the bulk annuity policy will be used to pay benefits covered by the policy.
- 8.2. The remaining assets of the Scheme are held in assets that can be realised at short notice.

9. Financially material considerations, non-financial matters, the exercise of voting rights and engagement activities, and policy on arrangements with investment managers

- 9.1. Since the vast majority of the Scheme's assets are held in an insurance policy, these matters are primarily an issue for the Insurer to manage. This is reflected in the Trustees' own policies, as summarised in Appendix 2.

10. Agreement

- 10.1. This statement was agreed by the Trustees and replaces any previous statements. Copies of this statement and any subsequent amendments will be made available to the Employer, the Scheme Actuary and the Scheme auditor upon request.

Agreed by the Trustees of the Millennium Inorganic Chemicals (U.K.) Pension Scheme on 27 November 2025

Appendix 1 Note on investment policy of the Scheme as at November 2025 in relation to the current Statement of Investment Principles

1. Choosing investments

The Trustees have appointed the following insurer to carry out the day-to-day investment of the Scheme:

- Just Retirement Limited (Annuity policy)

The Trustees have an AVC contract with ReAssure for the receipt of members' Additional Voluntary Contributions. The arrangement is reviewed from time to time.

The Insurer is authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority. The AVC provider is authorised and regulated by the Financial Conduct Authority.

The Trustees have appointed Barnett Waddingham LLP to advise on investment matters.

2. The balance between different kinds of investment

Most of the Scheme's assets are held in a bulk annuity policy. The remaining assets are held in the Scheme's bank account, bearing in mind the nature of the potential additional liabilities that may fall due on the Scheme that are not covered by the policy, and the ongoing expenses.

3. Investments and disinvestments

The Scheme's cashflow requirements are expected to be met by the Scheme's remaining cash holdings and the annuity policy.

Appendix 2 Financially material considerations, non-financially material considerations, the exercise of voting rights and engagement activities, and policy on arrangements with investment managers

1. Financially Material Considerations

The Trustees consider that factors such as environmental, social and governance (ESG) issues (including but not limited to climate change) have the potential to be financially material over the long-term. However, as the Trustees have completed a purchase of a bulk annuity policy intended to match the Scheme's liabilities, the Trustees is not directly exposed to these risks. The management of ESG and climate change by insurers was considered as part of the decision to purchase the buy-in policy.

The Trustees have an expectation that the Insurer will consider ESG-related issues in selecting securities and other investments, or will otherwise engage with the issuers of their underlying holdings on such matters in a way that is appropriate for the nature of the assets under consideration.

2. Approach to monitoring ESG policy

The Scheme's assets are held as a bulk annuity policy and cash (in the Scheme bank account). Given the nature of the current holdings in the Scheme, the Trustees will review and monitor the ESG policy as they deem appropriate, considering the risks that present themselves.

3. Policy on the exercise of voting rights and engagement activities

The Trustees note that by securing the Scheme's benefits with an insurer, they have limited ability to influence the voting and engagement activities undertaken on behalf of the Insurer. Responsibility for engagement with the issuers of investments underlying the bulk annuity policy, including voting policy (where applicable), is the responsibility of the Insurer. The Trustees have therefore not set stewardship priorities.

4. Conflicts of interest

The Scheme's investment adviser is independent and no arm of their business provides asset management services. This, and their FCA-regulated status, makes the Trustees confident that the recommendations they make are free from conflicts of interest.

The Trustees expects the Insurer to have a conflict of interest policy in relation to their engagement and ongoing operations. The Trustees therefore believe they have managed the potential for conflicts of interest in the appointment of the Insurer and investment adviser, and conflicts of interest between the Trustees, investment adviser, the Insurer, and any underlying investee companies.

5. Non-financially material considerations

When constructing the investment strategy and selecting investment managers, the Trustees do not prioritise non-financial matters. Given the bulk annuity purchase, the Trustees have limited ability to address non-financial matters.

6. Policy on arrangements with investment managers

Incentivising alignment with the Trustees' investment policies

Arrangements for incentivising the investment managers of the assets underlying the bulk annuity policy are an issue for the Insurer.

Method and time horizon for assessing performance

The Scheme invests exclusively in a bulk annuity policy. The Trustees do not undertake regular formal monitoring of the investment managers due to the limited benefit of this activity given the bulk annuity policy held with the Insurer for the majority of liabilities. However, the Trustees would undertake such monitoring if it was deemed necessary.

Portfolio turnover costs and duration of arrangement

The Trustees acknowledge that portfolio turnover costs can impact on the performance of their investments. However, given the bulk annuity policy of the Scheme, the Trustees note that the impact of portfolio turnover costs and the duration of arrangement are managed by the Insurer.
